

becky-liu / data-engineer

I am a Data Engineer with experience in data mining, cleaning, building Machine Learning models and developing tools and algorithms for data projects. In my previous career I worked in design for mobile adTech and the gaming industry as a brand guardian and art director for data-driven playable adverts .I am currently studying a Masters in Computer Science focusing on Data Analytics working on healthcare data projects using Python libraries: Matplotlib, scikit-learn, NLTK, seaborn, Pandas, Numpy. Seeking a role working with Machine Learning and Big Data.
